

# The perfect girth for your horse

Finding the right girth for your horse can be difficult. The QHP anatomical girths are designed for different horse bodytypes. Use this chart to find out which girth is perfect for your horse.

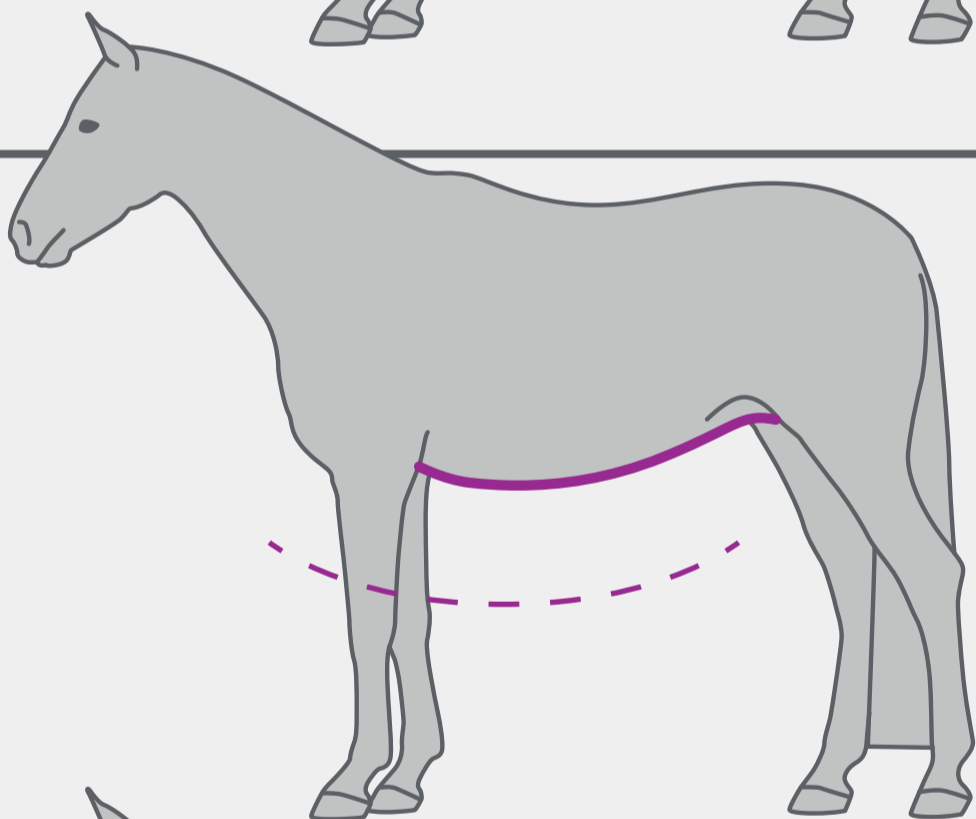

## Anatomic

### Your horse has:

- A well defined girth groove
- Girth groove well behind the elbow

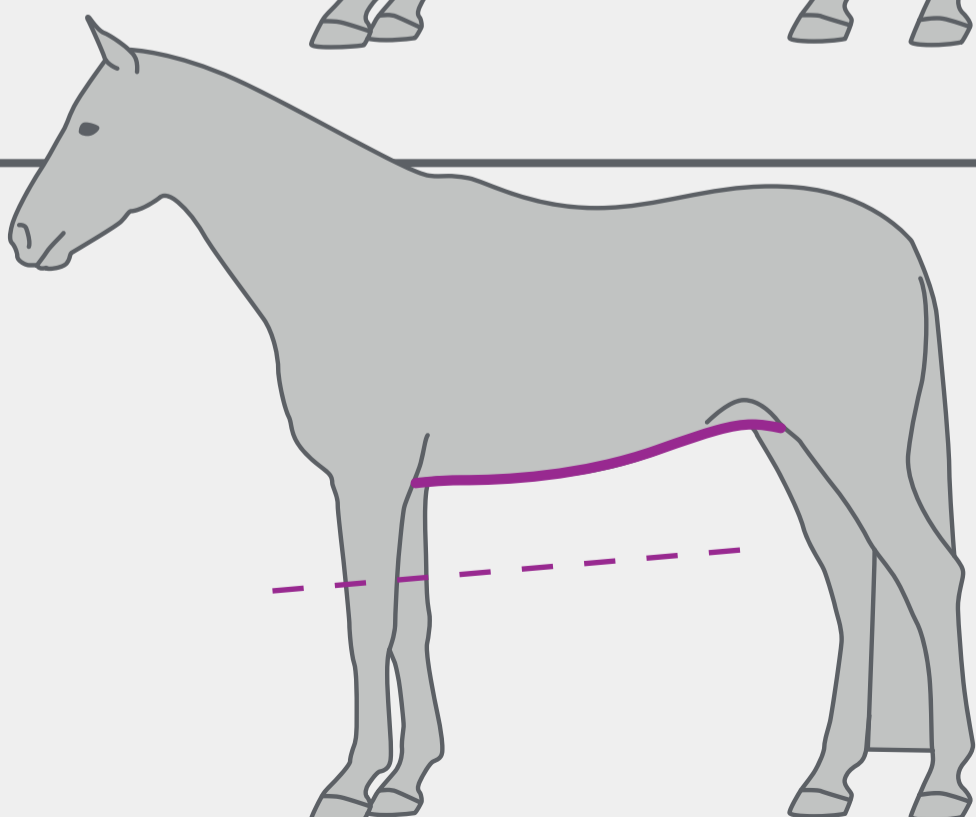

## Bold

### Your horse has:

- A short back, wide rib cage and/or narrow chest
- Girth groove may be close behind the elbow
- Straight girths slide forwards/pull saddle forwards

## Slim

### Your horse has:

- An athletic, wedge shaped build
- Girth groove is minimally defined
- Straight girths slide backwards/pull saddle backwards
